

Full HD 1080p Projector

Ideal for Small Office, Home Office

PJD7820HD

HDMI®
HIGH DEFINITION MULTIMEDIA INTERFACE

The ViewSonic® PJD7820HD is the best in class price-performance Full HD 1080p DLP® projector with 3,000 ANSI lumens and 15,000:1 contrast ratio. This projector is packed with features including HDMI®, 3D Blu-ray ready, multiple PC and video input options, 1.3x optical zoom, keystone correction, DynamicEco™ and integrated speaker. With the latest HDMI, the PJD7820HD can now display 3D images from 3D Blu-ray players. DynamicEco™ allows user to put the projector in “standby” energy-saving mode by reducing brightness down to 30% when the projector is not in use or without waiting for the projector to restart. Filter-less design and energy-saving eco-mode provide for virtually zero maintenance and product reliability. The ViewSonic PJD7820HD Full HD 3D 1080p projector is perfect for home, home office and small office.

Just Right for Small Office, Home Office

Packed with 3,000 lumens and a high contrast ratio of 15,000:1 (w/DynamicEco™), the PJD7820HD is guaranteed to be vibrant and shine in your office or home office.

Reliable Picture Quality & Color Performance

ViewSonic's DLP projectors provide reliable picture quality you can trust and superior color performance you can count on after thousands of hours of usage. Built on DLP technology, the ViewSonic PJD7820HD projector virtually eliminates image degradation known as color decay – yellow/faded tint that LCD projectors may develop after extended use. Even after years of use, the PJD7820HD is still producing a stunning, sharp image that lasts.

Full HD 1080p for Widescreen Brilliance

A widescreen projector sporting a full HD 1920x1080 (1080p) native resolution offers a tremendous degree of flexibility and compatibility. Whether you are connecting your widescreen laptop or viewing 1080p HD content, you are guaranteed a distortion-free image with matching aspect ratio.

HDMI with 3D Capability

Equipped with the latest HDMI, ViewSonic's PJD7820HD projector can now display 3D images directly from 3D Blu-ray® players. HDMI delivers the highest picture and sound quality without degradation. It's perfect for connecting to any HDMI-enabled devices from PCs, laptops, tablets, media players to Blu-ray® DVD players.

Full HD 1080p Projector

PJD7820HD

BrilliantColor™ Technology

ViewSonic's PJD7820HD projector with BrilliantColor technology features multi-color processing to produce stunning, vibrant colors. Unlike other technologies such as LCD which use just 3 primary colors to produce the image, the PJD7820HD uses up to 6 separate colors. The sophisticated 6-segment color wheel enhances the yellow color performance that is the key to accurate and vivid color reproduction. With multi-color processing, colors are richer and more vibrant with exquisite and precise detail.

Maintenance Free

ViewSonic's PJD7820HD projector enables a filter-less design. Unlike LCD projectors require to clean, sometimes to replace, filters after every 100 to 300 hours of operation, the ViewSonic PJD7820HD projector is filter-less that eliminates the need for filter cleaning or filter replacement. This saves you significant maintenance dollars and labor over the projector's lifespan, and lowers your total cost of ownership (TCO).

Long Lamp Life up to 6000 Hours

The new advanced lamp technology extends the lamp life up to 6000 hours*, this means huge savings on lamp replacement costs.
