This small. That powerful.

With powerful processors and high-capacity hard drives, you can count on full-size desktop performance in a slim, space-saving design.

So small. So big on possibilities.

Sleek space-saver: Streamline your space with a desktop that's easy on the eyes. The attractive design with a smooth black surface fits in nicely anywhere in your home. It also frees up desk space to let you enjoy more elbowroom for picture frames, souvenirs, snacks, or whatever it is you like to have handy.

Optional HD monitor: View videos or organize photos on the HD or Full HD display of your choice. Choose the screen size that best suits your needs with the added flexibility to upgrade to a second display or larger monitor later.

Speedy, smooth and spacious.

Power player: Count on the same performance of a regular desktop in a smaller PC with the latest processing power – up to 4th Gen Intel® Core™ i5 processors. Run multiple programs at once so you can work on your website, create presentations, make a movie or listen to music at the same time with less lag.

Updated operating system: Navigate smoothly with the new, feature-rich Windows 8.1. Learn how to personalize your desktop with great new apps and features that make multitasking a breeze. Windows® 7 options available on select Inspiron desktops.

High-capacity hard drive: With up to 1 TB of space, you'll have room for all your photos, videos and important documents.

Seamless connectivity.

It's easy to connect to your other devices with convenient accessibility to plenty of ports so you can link up your camera, console or HDTV to exchange data, or even charge devices. You'll also get USB 3.0, standard WiFi, 1 TB of max Hard Disk Drive and Bluetooth®.
