## HP Monitored Power Distribution Unit (PDU)

### Overview

The HP Monitored PDUs allow administrators and facility personnel to monitor current draw directly at the rack and per PDU. HP Monitored PDUs are available in both 1 phase and 3 phase and in single and dual input. Power capacity per PDU ranges from ranging from 4.9 kVA up to 22 kVA to provide flexibility in deployment. Available PDU's include full rack models with 39 receptacles on the single input models or with 78 receptacles on the dual input models. Half rack versions are single input and are available in a popular single phase model with 24 C-13 and 3 C-19 receptacles and a high capacity 3 phase model with 12 C-19 receptacles for use in dense BladeSystem environments. The optional PDU Management Module allows for remote monitoring of the PDUs across the network.

### Full Rack Vertical PDU Model (Ideal for 36U to 47U racks)

### What's New

- New S340 Monitored PDU is a half height form factor that connects to a 50 amp 3 phase circuit using the popular CS8365C connector. The new S340 has a single input and 12 C19 outputs for connection to a variety of HP equipment.

## HP Monitored Power Distribution Unit (PDU)

### Standard Features

#### Target Applications and Markets

- **24/7 data centers**
  - The HP Monitored PDU enables data centers to provide full rack power from one or more power distribution units. Available products include vertical rack mount taking 0U of rack space, as well as single or dual input models for increased power redundancy. Half height PDUs are perfect for BladeSystems and dense environments.
- **Power monitoring**
  - The HP Monitored PDU provides local and optional remote load monitoring. Each PDU chassis includes two serial ports-#1 for local set-up and configuration and #2 for attachment of the optional remote monitoring module.  
**NOTE:** [Optional remote monitoring with HP PDU Management Module \(PN: AF400A\)](#)
- **Power display**
  - The local user interface consists of a basic control panel that includes a two-digit 7-segment display, a recessed reset button, a scroll/invert button and 6 segment-dedicated LEDs. Local alarms are annunciated for current and voltage excursions.

#### Customer Challenges/Requirements

- Easy access to power multiple servers, storage and other rack mount equipment
- Need more outlets and more power in each rack
- Require easy and quick access to all power outlets in the back of the rack
- Monitor power in each rack and each PDU locally or remotely

#### Model Features - Full-Rack Vertical PDU

- Single and dual input models
- Single and three phase inputs
- 36 C13s + 3 C19s per input (single input models)
- 72 C13s + 6 C19s per input (dual input models)
- Unique color-coded load identification
- Local power monitoring display and optional remote power reporting with the PDU Management Module

#### Model Features - Half-Rack Vertical PDU

- Single input Models
  - 3 phase input with 12 x C-19s
  - Single phase input with 24 x C-13 and 3 x C-19
- Unique color-coded load identification Local power monitoring display and optional remote power reporting with the PDU Management Module

#### Mounting

- All monitored PDUs can be mounted to connect to either under floor or overhead electrical whips
- The 7U high monitored PDU breaker box may impede the cable management arms of some ProLiant servers. HP recommends either using the rack extension kit or placing IT equipment in the 7U space which does not use cable management arms, UPS, KVM, etc.
  - Models S124 and S132 do not have this restriction.
- Models S340, S348 and S332 include fixed rail and swing out brackets for mounting behind BladeSystem enclosures

## HP Monitored Power Distribution Unit (PDU)

---

### Standard Features

#### Optional HP PDU Management Module

- The HP PDU Management Module enables you to monitor power environments through comprehensive control of individual HP PDUs. The module can be configured to send alert traps to HP Systems Insight Manager and other SNMP management programs or used as a standalone monitoring system. This flexibility enables you to monitor up to two PDUs through the network connector or serial connector located on the front of the management module. To facilitate day-to-day maintenance tasks, the embedded management software provides detailed system logs.
- The HP PDU Management Module provides remote monitoring of a PDU by connecting the PDU directly to the network. Monitoring of the PDU can be achieved from anywhere and at anytime via a standard web browser.

**NOTE:** For additional information on the PDU Management Module please go to:  
<http://h18004.www1.hp.com/products/servers/proliantstorage/power-protection/power-distribution/module/index.html>

### Service and Support

HP Care Pack services provide a range of life cycle support options that let you choose the service levels that meet your business requirements, from basic to mission-critical.

A full range of HP Care Pack hardware and software services are available including:

- Installation and start up
- Education courses
- Extended onsite hardware coverage hours from same business day 13 hours, 5 day to 24 hours, 7 days call window with options including 4-hour response or 6-hour Call To Repair
- Comprehensive range of software technical support for Microsoft, Linux, ProLiant Essentials and VMware-based IT solutions helping to deliver high level of application availability. Response times range from 30 minutes for critical problems to 2 hours.
- System Management, Performance Services and Mission Critical Support Solution

**NOTE:** For more information on HP Care Pack services, contact any of our worldwide sales offices or resellers or visit our worldwide Web site on the internet at: <http://www.hp.com/hps/carepack>

**NOTE:** For more complete information on HP Services offerings, customers and resellers, please visit us at: <http://www.hp.com/hps>

**NOTE:** Additional information regarding worldwide limited warranty and technical support is available at: <http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html>

**NOTE:** For additional information on Server Services, Rack and Power Options, please visit: <http://h20219.www2.hp.com/services/cache/111072-0-0-225-121.html>

**NOTE:** The information contained herein is subject to change without notice and is provided "as is" without warranty of any kind.

**NOTE:** The warranties for HP products and services are set forth in the express limited warranty statements accompanying such products and services.

**NOTE:** Nothing herein should be construed as constituting an additional warranty. HP shall not be liable for technical or editorial errors or omissions contained herein.

## HP Monitored Power Distribution Unit (PDU)

### Technical Specifications

Model number		S124 (NA/JPN)	S132 (INTL)
Part number		AF914A	AF915A
Input ratings			
Voltage (VAC)		200-208V 60/50Hz 1U	220-240V 50/60Hz 1U
Current (Amps)			
Branch circuit requirements		208V, 1Ø, 3-wire, 30A	200-240V, 1Ø, 3-wire, 32A Category D Breaker
Input Plug/Cord Rating		NEMA L6-30P	IEC60309 332P6 Splashproof 2 pole, 3 wire, 240VAC, 32A
Input cord length		96 in (2.4m)	96 in (2.4m)
Facility receptacle needed		NEMA L6-30R	IEC60309 2 pole, 3 wire, 240VAC, 32A Hubbell C332C6S, C332R6S, or equivalent
De-rated capacity		24A	n/a
Output ratings			
Voltage (VAC)		200-208V 60/50Hz 1U	220-240V 50/60Hz 1U
Current (Amps)			
Outlet rating	C-13	10A	10A
	C-20	16A	16A
Load segment	L3	20A	20A
	L2	20A	20A
	L1	20A	20A
Total		24A	32A
Power (kVA)		4.9 kVA	7.3 kVA
PDU Total		4.9 kVA	7.3 kVA
Number of outlets			
Load segments	C-13	3 load segments 8 x C-13 outlets per segment	3 load segments 8 x C-13 outlets per segment
	C-19	3 (1 per segment)	3 (1 per segment)
PDU total	C-13	24	24
	C-19	3	3
Dimensions & Weights			
Product	Height	28.86 inches (733mm)	28.86 inches (733mm)
	Width	3.78 inches (96mm)	3.78 inches (96mm)
	Depth	1.97 inches (50mm)	1.97 inches (50mm)
	Weight		
Shipping	Height	34.4 inches (874.7 mm)	34.4 inches (874.7 mm)
	Width	7.94 inches (201.6mm)	7.94 inches (201.6mm)
	Depth	5.13 inches (130.2 mm)	5.13 inches (130.2 mm)
	Weight	13.2 pounds (5.99 Kg)	13.1 pounds (5.94 Kg)

## HP Monitored Power Distribution Unit (PDU)

### Technical Specifications

Disclaimer: HP makes no recommendations regarding power connector manufactures. The manufacturers and model numbers listed in the above tables are strictly for the purpose of providing examples. Please consult a licensed professional to determine the best connector or receptacle for your specific needs.

#### Environment-friendly Products and Approach

#### End-of-life Management and Recycling

Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: <http://www.hp.com/go/green>. To recycle your product, please go to: <http://www.hp.com/go/green> or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.
