

HP ePrint App

Fast and easy mobile printing for your Android, Apple iOS, and Blackberry devices.

The HP ePrint app lets you print from your smartphone or tablet at home, at work or on the go¹. This app works with HP ePrint-enabled printers as well as older HP network printers, and lets you print to thousands of HP Public Print Locations around the world².

The HP ePrint App works with select HP Deskjet, Photosmart, ENVY, Officejet, LaserJet, and Designjet printer models. For more information visit hp.com/go/eprintapp.

HP ePrint App features:

- Automatic selection of the best connection path to your HP printer, at home, in the office or on the go
- Support for printing at HP Public Print Locations²
- Ability to change printer settings to two-sided printing, print multiple copies and print in various photo sizes

Home or Office

HP Public Print Locations

- Also supported for Kindle Fire and Kindle Fire HD devices via Amazon App store

BlackBerry® Smartphones³ (OS 4.5 or later)

- Free download from the Blackberry App World
- Page range print support for select content types
- Not supported on BBos v10 or newer

Connection options:

Home or office

- Print to any HP network printer, even older models via an existing wi-fi local network¹
- Connect and print directly peer-peer to select HP printers supporting HP wireless direct printing⁴

On the Go⁵

- Print remotely from virtually anywhere via the Internet to any HP ePrint-enabled printer
- Find and then send print jobs from virtually anywhere via the Internet to thousands of HP Public Print Locations worldwide³

Scan here from your mobile device to download the app.

¹ Local printing requires mobile device and printer to be on the same network or have a direct wireless connection to printer. Wireless performance is dependent upon physical environment and distance from access point. Wireless operations are compatible with 2.4 GHz operations only. Remote printing requires an internet connection to an HP ePrint enabled printer. App or HP ePrint account registration may also be required. Wireless broadband use requires separately purchased service contract for mobile devices. Check with service provider for coverage and availability in your area.

² Use of the HP ePrint App at HP Public Print Locations requires an internet connected smartphone or tablet with a separately purchased wireless Internet service. Availability and cost of printing varies by location. Learn more at hp.com/go/eprintmobile.

³ HP ePrint app not supported on BBOS v10 or newer.

⁴ Mobile device and printer need to have a direct wireless connection prior to printing. Learn more about HP wireless direct printing at hp.com/global/us/en/wireless/wireless-direct. Wireless performance is dependent upon physical environment and distance from the access point in the printer.

⁵ Remote on-the-go printing requires an internet connected mobile device with a separately purchased internet service. Printing can be done to any web connected HP ePrint printer or to an HP Public print location. Learn more about HP PPLs at hp.com/go/eprintmobile.
