# HP School Pack 2.0 featuring Classlink

## Single sign-on for HP School Pack

Meet and exceed the global requirements of learners with HP School Pack 2.0[1]—an out-of-the box solution of digital tools and content designed for collaborative, standards-aligned, and personalized learning—and Classlink, the app that allows you to consolidate passwords to help students quickly gain access to all their software and cloud-based learning tools— regardless of the device—with just one login.[2]

## Classlink

**Safe and secure student data**
School publishers accept Classlink's common, open standards-based data format. Only the required student information is sent, using a secure and automatic system. Meanwhile the data resides on a virtual server within the district, not in the cloud where pertinent information could be compromised.

**Files available anytime, anywhere**
Students keep files in a variety of places, such as school networks or the cloud. With Classlink, students and educators can access all their files in real time no matter where they are stored. The files are easily shareable and can be edited from any device.

**Secure Data**

**File Access**

# More time
## spent learning.
## Less time logging in.

**Single Sign-On**

**Mobile Capabilities**

[1] Internet connection required and sold separately.
[2] One-year subscription included for accounts with 60 or more students. Purchase required after one year.

**Content is easily accessible**

Learning resources are ready for use instantly and remain that way throughout the school year, even when enrollments change. With the Classlink's one click automatic sign-on students can join class groups that have been previously set up from any computer, tablet, or smartphone.

**System requirements**

Classlink's mobile capabilities allow it to work with nearly every portable device.
