HPE LPe1205A 8Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class

Overview

HPE LPe1205A 8Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class

The HPE LPe1205A dual port Fibre Channel HBA provides reliable, high-performance connectivity up to 8Gb/s. The HPE LPe1205A also provides features such as data integrity, security and virtualization which are all complimentary to initiatives important to the enterprise data center. For greater system up time, the HPE LPe1205A dual port design is the ideal Fibre Channel connectivity solution for applications that rely on high-availability for business continuity. The HPE LPe1205A leverages the several generations of Fibre Channel design to provide the greatest level of performance, scalability and manageability. Using Emulex's exclusive firmware and driver architecture, the HPE LPe1205A is designed to be fully driver compatible with all Emulex HBAs. Furthermore, this architecture allows firmware to be upgraded without taking the server off-line or re-booting, and without the need to upgrade the driver. This provides hardware investment protection and ensures maximizes system uptime. As with all Emulex LightPulse Fibre Channel HBAs, the HPE LPe1205A is managed with Emulex OneCommand™ Manager (OCM) HBA management application. OCM provides a secure, centralized administration console to discover, and manage Emulex Fibre Channel HBAs on local and remote hosts. Powerful diagnostic tools and flexible interface options (GUI, CLI and Browser) provide the greatest level of manageability. Fibre Channel is the de-facto standard for virtual server storage connectivity and Emulex HBAs are fully qualified for virtual server environments.

HPE LPe1205A 8Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class

659818-B21
QuickSpecs

Overview

Key Features

- Comprehensive virtualization capabilities with support for N-Port ID Virtualization (NPIV) and Virtual Fabric
  - Support for up to 255 VPorts improves server consolidation capabilities and asset utilization
- Superior performance capable of sustaining up to 200,000 I/Os per second per channel
  - Delivers the performance needed for high transaction data base environments (i.e. Oracle, SQL Server, etc)
- Host to Fabric FC-SP authentication
  - Provides advanced security protecting the SAN from potential threats such as WWN spoofing, compromised servers etc.
- BlockGuard™ ready (T10-DIF) - ensures end-to-end data integrity
- Common driver model allows a single driver to support all Emulex HBAs on a given OS
- Easy deployment of new firmware with minimal server reboots
- Efficient centralized administration of Emulex HBAs via powerful management tools
- 8, 4, 2 Gb/s Fibre Channel link speed support
- Full fabric support with automatic topology and auto-negotiation
- Message Signaled Interrupts eXtended (MSI-X) Support for Greater Host CPU Utilization
  - Streamlines interrupt routing to improve overall server efficiency
- PCI Express Bus: Gen I (x8), Gen II (x4)
- Multi-Path support for redundant HBAs and paths
- Support FC-Tape devices
- Operating Systems and Virtualization Software Supported: Windows Server 2008, VMware 5.0, RHEL 5, RHEL 6, SLES 10, SLES 11, Solaris 10 x86
- Improved Power Management by monitoring the environment

Features and Benefits

- Cost-savvy
  - Emulex installation and management tools automate installation and provide local and remote HBA configuration and management, therefore reducing cost of HBA installations across the enterprise
  - Emulex's automated installation facilities and extensive management capabilities speed HBA deployment and device management, while reducing administration costs and protecting IT investment.
  - Emulex HBAs feature a firmware upgradeable architecture for long-term investment protection, feature and performance upgrades and seamless backward compatibility.
- Change-ready
  - Fully compatible with Virtual Connect
  - Emulex's unique Service Level Interface (SLI) architecture allows complete independence between HBA hardware, firmware and drivers. That means no reboots during configuration changes and no need for OS specific firmware. A single driver model simplifies management and upgrades across multiple generations of HBAs.
  - Powerful automation capabilities facilitate remote driver parameter, firmware and boot code upgrades. Advanced diagnostic features such as HBA beaconing and HBA statistics help to optimize management and network performance while the environmental monitoring feature helps to maintain optimum host to fabric connections. In addition to the GUI interface, management functions can also be performed via a scriptable Command Line Interface (CLI) as well as a web browser.
- Energy-thrifty
  - The Fibre Channel link rate provides greater bandwidth as a percentage of power consumed
  - Virtualization capabilities (NPIV and Virtual Fabric) improve server consolidation capabilities and asset utilization
  - Frame-level Multiplexing and out-of-order frame reassembly increases link efficiency and maximizes HBA performance.
- Time-smart
  - A common driver model amongst all Emulex HBAs enables a customer to standardize on one driver version across
Overview

their entire installed base - thus reducing the cost and complexity of managing all HBAs.

- Superior Quality and Reliability- Emulex HBAs deliver industry-leading reliability levels which minimizes downtime and increases productivity
- Emulex LightPulse HBA management capabilities enable secure, centralized discovery, monitoring, reporting, and administration of Emulex HBAs on local and remote hosts.
- With in-band and out-of-band management capabilities, Emulex provides data center administrators with the greatest level of management flexibility.

c-Class

Product Highlights

Superior Quality and Reliability
Emulex HBAs deliver industry-leading reliability levels by utilizing a field-proven, single-chip design that minimizes components. Emulex HBAs also use a combination of parity, CRC, ECC and other advanced error checking methods to verify the integrity of data blocks, which are passed from the host interface through the HBA.

The Most Efficient Installation and Management
Emulex management tools automate installation and provide local and remote HBA configuration and management. Emulex's unique Service Level Interface (SLI™) architecture allows complete independence of device drivers from HBA hardware and firmware. That means no reboots during most configuration changes and no need for OS specific firmware. A single driver model simplifies management across multiple generations of HBAs. In addition, Emulex HBAs have a firmware-based architecture that enables feature and performance upgrades without costly hardware changes, for long-term investment protection and seamless backward compatibility.

Maximum SAN Performance
Emulex HBAs deliver maximum performance levels in real-world application environments, with superior full-duplex data throughput and I/Os per second. And Emulex's exclusive Dynamic Frame Multiplexing ensures consistently superior performance in mixed load environments such as disk and tape back-up applications.

The Fastest Diagnosis and Recovery
Comprehensive diagnostic functions, coupled with detailed event logging and tracing, provide for fast, efficient SAN troubleshooting.

The Broadest Enterprise Deployment
With supplier formidable install base, Emulex is trusted by the world's largest, mission critical enterprises. Long-standing partnerships with leading storage vendors ensure unparalleled compatibility levels.

Software Features
A rich suite of management tools complements the LightPulse family of enterprise Fibre Channel HBAs. As a centralized management suite, OCM incorporates agent technology that provides discovery, reporting and management of local and remote HBAs with both in-band Fibre Channel and out-of-band IP support, enabling sophisticated management capabilities such as remote firmware upgrades and advanced diagnostics from a single console anywhere in the SAN.

All Emulex device drivers are fully compatible with previous generations of Emulex host bus adapters. A single driver binary supports all Emulex HBAs on a given host platform, streamlining the management of device drivers in environments with multiple generations and versions of HBAs, simplifying the upgrade process, and providing investment protection.

BladeSystem Compatibility

8Gb c-Class HBA Mezzanine (Mezz) Card Applications

Supported HPE ProLiant Server Blades
BL660c Gen8
BL465c Gen8
BL460c Gen8
BL460c Gen9
BL660c Gen9
QuickSpecs

HPE LPe1205A 8Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class

Product Highlights

WS460c Gen9

NOTE: The HPE LPe1205A 8Gb FC HBA for HPE BladeSystem c-Class must be deployed with the c-Class BladeSystem infrastructure and will only work with the BL c-Class Server Enclosures.

NOTE: The HPE LPe1205A 8Gb FC HBA for HPE BladeSystem c-Class is not compatible with HPE ProLiant Generation 7 and earlier server blades.

NOTE: This is a Type A mezzanine card, and can be configured in either Type A or Type B slots on HPE ProLiant Gen8 Server Blades.

Switch interoperability

HPE Storage and Third Party Switches

- HPE Virtual Connect Products
- 8Gb Switches and Directors
- 4Gb Switches and Directors
- 2Gb Switches and Directors
- Compatible with Fibre Channel switches including Hewlett Packard Enterprise and third party vendors including Cisco, Brocade, and McData
- HPE 4Gb Fibre Channel Pass Thru Module for BladeSystem c-Class

*Servers must connect to a SAN and never directly to a storage device.

Service and Support

HPE Technology Services

HPE Technology Services offers you consultants and support experts to solve your most complex infrastructure problems. We help keep your business running, boost availability and avoid downtime.

Protect your business beyond warranty with HPE Care Pack Services

When you buy HPE Options, it's also a good time to think about what level of service you may need. HPE Care Pack services provide total care and support expertise with committed response choices designed to meet your IT and business need.

Recommended Services

Recommended HPE Care Pack Services for optimal satisfaction with your HPE product

3-Year HPE 24x7 4 hour Response, Hardware Support Onsite Service

Provides you with rapid remote support and if required an Hewlett Packard Enterprise Authorized representative who will arrive on site any time and day of the year to begin hardware maintenance service within 4 hours of the service request being logged.

HPE ProLiant Server Hardware Installation

Provides for the basic hardware installation of Hewlett Packard Enterprise branded servers, storage devices and networking options to assist you in bringing your new hardware into operation in a timely and professional manner.

Related Services

Related HPE Care Pack Services to enhance your HPE product experience

3-Year HPE 6 hour Hardware Support Onsite Call-to-Repair Service

Provides an IT manager with a team of support specialists who will quickly begin troubleshooting the system to help return the hardware to operating condition within 6 hours of the initial service request to the HPE Global Solution Center.

HPE Proactive Select Service

Provides a flexible way to purchase Hewlett Packard Enterprise best-in-class consultancy and technical services. You can buy Proactive Select Service Credits when you purchase your hardware and then use the credits over the next 12 months.

Product Highlights

Insight Remote Support
Delivers secure remote monitoring and support for Hewlett Packard Enterprise servers and storage, 24x7 at no additional cost. Available as part of HPE Warranty, Care Pack and Service Contract offers.

Parts and materials
Hewlett Packard Enterprise will provide HPE-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements. Supplies and consumable parts will not be provided as part of this service; standard warranty terms and conditions apply. Parts and components that have exceeded their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual or the technical product data sheet will not be provided, repaired or replaced as part of this service.

Coverage
For ProLiant servers and storage systems, this service covers HPE-branded hardware options qualified for the server, purchased at the same time or afterward, internal to the enclosure, as well as external monitors up to 22" and tower UPS products; these items will be covered at the same service level and for the same coverage period as the server unless the maximum supported lifetime and/or the maximum usage limitation has been exceeded. Coverage of the UPS battery is not included; standard warranty terms and conditions apply.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. It does not apply to any exchange of Disk or SSD/Flash Drives that have not failed. SSD/Flash Drives that are specified by Hewlett Packard Enterprise as consumable parts and/or that have exceeded maximum supported lifetime and/or the maximum usage limit as set forth in the manufacturer's operating manual or the technical data sheet are not eligible for the defective media retention service feature option.

## Environment-friendly Products and Approach

Hewlett Packard Enterprise offers end-of-life Hewlett Packard Enterprise product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: [http://www.hpe.com/info/recycle](http://www.hpe.com/info/recycle). To recycle your product, please go to: [http://www.hpe.com/info/recycle](http://www.hpe.com/info/recycle) or contact your nearest Hewlett Packard Enterprise sales office. Products returned to Hewlett Packard Enterprise will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard Enterprise website at: [http://www.hpe.com/info/recycle](http://www.hpe.com/info/recycle). These instructions may be used by recyclers and other WEEE treatment facilities as well as HPE OEM customers who integrate and re-sell Hewlett Packard Enterprise equipment.
